BROOKLYN

BROOKLYN

Brooklyn evokes the charm of historic architecture through high contrast frames and subtle detailing, yet is tailored to fit into modern interiors. Achieve an industrial look and feel with this meticulously calculated design.

Brooklyn abolishes the need for old and 'uninteresting' office partitions that are commonly used to divide space. Taking inspiration from past generations but tailored to today's building requirements, the Brooklyn system is a key element in creating an office environment with an art deco or warehouse feel. The contours and contrasting elements have been measured to the finest detail, providing a system that gives a modern take on a classic design within a commercial office environment.

SYSTEM FEATURES

- Rich texture provided by multiple reveals and relief details
- Customisable transoms and mullions
- Classically styled doors
- Easy installation
- Glass thickness 10mm – 12mm (+/- 0.5mm)
- Door thickness 30mm
- Recommend panel width not to exceed 1200mm for ease of installation
